Search strategy - Trademarks

Chosen search strategy: **Comprehensive**

Description of accuracy

The Comprehensive search algorithm is built with a statistical method, using more than 1 million official cases where two marks have been found confusingly similar by a government official in the US and the EU.

This means that the Comprehensive search and watch reports cover all the usual search strategies applied in manual searching, such as:

- identical
- phonetic similarity
- orthographic similarity and misspellings
- prefix, infix and suffix variations
- vowel and consonant similarity
- plurals and stemming
- abbreviations and acronyms
- other similarities

The Comprehensive algorithm also applies unique "noise" reduction techniques. This results in a lower number of results without affecting the overall quality (reaching more than 99% of potential conflicts).

Statistical Risk Analysis - Trademarks

The ranking of results is based on a statistical analysis of more than 1 million official cases of confusingly similar trademarks in the EU or the US. The four "Risk levels" indicate statistically where you will find potential conflicts.

Level 1 - Very high risk.

Of all conflicts, 20% have these types of similarities.

Level 2 - High risk.

Of all conflicts in Europe or the US, 40% have these types of similarities.

Level 3 - Medium risk.

Of all conflicts in Europe or the US, 25% have these types of similarities.

Level 4 - Low risk.

Of all conflicts in Europe or the US, 15% have these types of similarities.

Common law sources - Scope of search

An automated search, with the described limitations, has been done for the following common law sources:

US businesses names

Scope of search: A search among more than 20 million secretary of state business records from all US states and Washington DC.

Domain names

Scope of search: Identical and very similar results from more than 1000 TLD's.

Web search

Scope of search: An automated web search where known biases as region and personal search history have been eliminated. The search combines the trademark name with important keywords provided during the order (or just the trademark name if no keywords were provided). The top 30 results are included.

Images

Scope of search: The same search settings as the Web search. The top 30 results are included.

Social media search

Scope of search: A search of the use of the trademark name in the world's largest social networks: Facebook, LinkedIn, Twitter, Instagram, YouTube and Pinterest. The top 10 results from each social network are included.

Social names

Scope of search: A search if the trademark name is registered as a user name in any of 48 social networks.

App names

A search if the trademark name is used in Google Play and App Store application names. The top 30 results are included.

Summary (custom page)

This section can be used for your Legal opinion, summary or extended comments.

Title: Accel Research Sites (@AccelResearch) / Twitter
Description: Accel Research Sites. @AccelResearch. We bring together families, healthcare providers, and researchers to improve the quality of life for current and ...

The screenshot shows the Twitter profile page for Accel Research Sites (@AccelResearch). The profile picture is a blue and white logo. The bio states: "We bring together families, healthcare providers, and researchers to improve the quality of life for current and future patients through #clinicalresearch." The location is listed as "Florida | Alabama | Georgia" and the website is "accelresearchsites.com". The profile was joined in March 2020. There are 17 following and 19 followers. The tweet from January 19th reads: "When you participate in a #clinicaltrial, you're not only helping medical professionals gain insights and answers about the safety and effectiveness of treatments and procedures, you're becoming a part of healthcare history. #ClinicalResearch bit.ly/3J0ruTk".

The screenshot shows the Twitter interface. At the top is a search bar with the text "Search Twitter". Below it is the "New to Twitter?" section, which includes a sign-up prompt: "Sign up now to get your own personalized timeline!". There are three buttons: "Sign up with Google", "Sign up with Apple", and "Create account". Below this is a disclaimer: "By signing up, you agree to the Terms of Service and Privacy Policy, including Cookie Use." The "You might like" section features three recommendations: "Aqua Hair Extensions @AquaExtensions", "GlowTouch Official @GlowTouch", and "LisaWolfe @LisaWolfe", each with a "Follow" button. A "Show more" link is at the bottom.

2	Google Play	Accel	Health & Fitness		Accel	0 / 0	0 USD
<p>Description: Intuitive, flexible programming and data analysis: Accel is designed with simplicity in mind. Just with a 3-minute video tutorial, supervisors will start writing programs and creating custom data collection forms. Analyze data with graphs and progress summary. Review notes that summarize clients' response to intervention. Optimized for mobile data collection: Therapists can take a whole range of data –correct/incorrect, prompt level, task analysis, ABC data, interval recording, probe, or you name it- right on their fingertips. Imagine collecting data, reviewing programs and data, and writing session notes anywhere, anytime. Your work should not be disrupted by "technology glitches". This mobile app works seamlessly without internet connection. Protect yourself from insurance audit: Without sacrificing your time on clients. Accel's session note templates capture quantitative and qualitative data and allow you to create comprehensive session notes in less than 3 minutes. Stay compliant and audit-proof.</p>							
3	Google Play	Accel Client	Productivity		Koa Process LLC	0 / 0	0 USD
